-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Applicant's election without traverse of Species 2 in the reply filed on 7/18/05 is acknowledged. However, upon reconsideration the Examiner has concluded that there should have been a restriction done in addition to the prior restriction. The Examiner apologized for any inconvenience brought upon the Applicants. An additional restriction is necessitated due to the recognized divergent subject matter.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6,12,15,17-19,21-37, drawn to a flower box assembly, classified in class 47, subclass 39.
- II. Claims 38-40, drawn to a method for handling a flower box assembly, classified in class 47, subclass 66.7.
- III. Claim 41, drawn to use of a flower assembly, classified in class 47, subclass 66.7.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product such as without using the step of placing the inner box in a second inner box holder wherein subsequently the second inner box holder is pulled up alongside the inner box.

Art Unit: 3644

4. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product such as without using the step where the inner box holder is used in an inverted position to hold the inner box.

5. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because the method in Group II requires the step of an inner box is placed in a second inner box holder in which the method in Group III does not require and the method in Group III requires the step of an inner box holder is used in an inverted position to hold the inner box holder in which the method in Group II does not require.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trinh T. Nguyen whose telephone number is (571) 272-6906. The examiner can normally be reached on M-F (9:30 A.M to 6:00 P.M).
